“The Psychosocial Oncology Society has provided me a home. It is from this organization that I have found the tools and the support to attempt to help patients and their families. The American Psychosocial Oncology Society continues to broaden my horizons, professionally and personally. As we are a newer Society I want to make sure that those who come after me will have the same if not enhanced experience. These are in part some of the reasons that I support the future fund.”

Why will you give?

Be a catalyst for thought leadership and innovation.

Badges

Your name badge admits you to attend Conference activities for which you are registered. You must wear your name badge at all times while you are in the conference area, to identify yourself as an APOS attendee.

Registration Desk Hours

Conference Registration is located in the Caribbean Registration Desk. The Registration Desk is open during these hours:

- Wednesday, February 15 7:00 AM – 6:00 PM
- Thursday, February 16 7:00 AM – 6:00 PM
- Friday, February 17 7:00 AM – 6:00 PM
- Saturday, February 18 7:00 AM – 1:00 PM

The APOS Speaker Ready Room is open on the below dates and times for presenters to upload slides. The meeting organizers ask that all speakers upload their slides 24 hours prior to their scheduled presentation time. The Speaker Ready Room is located in the Regents Boardroom.

- Wednesday, February 15 7:30 AM – 5:00 PM
- Thursday, February 16 7:00 AM – 6:00 PM
- Friday, February 17 7:00 AM – 5:00 PM
- Saturday, February 18 7:30 AM – 11:00 AM

APOS Membership - If you would like to join APOS, you can log onto our website at www.apos-society.org and register online. You may also contact the APOS office at 615-432-0090 for more information.
The 2018 APOS Annual Meeting will take place February 22–24, 2018 at the Westin La Paloma Resort & Spa in Tucson, Arizona.

Stay Tuned! Details regarding abstract submission for the 2018 Meeting will be released in July, 2017.
Be sure to visit our conference exhibitors!

Please note, due to print deadlines there may be additional exhibitors or supporters not listed in this program.

APOS offers sincere gratitude to all of our 2017 14th Annual Conference supporters!

Friday, February 17, 2017

9:45 AM – 11:15 AM  Symposia

- 9. The ABC’s of AYAs  Caribbean VI
- 11. Translation of Cancer Stress Management Research to Target Disparities and Improve Access in the Era of Mandated Distress Screening  Caribbean V
- 12. The Role of E-Health in Delivering High Value, Equitable Psychosocial Cancer Care: Reports From the Cutting Edge  Caribbean IV

11:15 AM – 12:15 PM  Lunch on Your Own

11:15 AM – 12:15 PM  Meet-the-Expert Lunches

- Pediatric, Adolescent and Young Adult Considerations in Psychosocial Oncology  Boca IV
- Geriatric Considerations in Psychosocial Oncology  Boca V
- Models of Distress Screening in Psychosocial Oncology  Boca VII
- Ethnic and Cultural Considerations in Psycho-Oncology  Boca VI
- Sexual Health and Fertility in Cancer  Boca II
- mHealth Interventions in Psychosocial Oncology  Boca III

12:25 PM – 1:55 PM  Plenary Session  Caribbean IV-V

Pediatric Psychosocial Standards of Care: Development, Implementation and Future Directions

Speakers:
Lori Wiener, PhD, DCSW, FAPOS, accompanied by Vicki Sardi-Brown, PhD, LPC and Peter Brown
Melinda and Lee Marchiano (Childhood Cancer Survivor and Parent Advocate)
Andrea Patenaude, PhD

Moderator: Julia Rowland, PhD

2:00 PM – 3:30 PM  Poster Session II and Exhibits  Caribbean I-III

3:30 PM – 5:00 PM  Symposia

- 14. Population Based Patient-Reported Outcomes Among Older Adults With Cancer  Caribbean VI
- 16. Planning Ahead: Decisional Capacity, Advance Directives, and the Development of Innovative Approaches to Advance Care Planning in Adults With Cancer  Caribbean IV
Friday, February 17, 2017

5:00 PM – 5:15 PM  Networking Break in Exhibits  Caribbean I-III

5:15 PM – 6:45 PM  Symposia

A  17. Incorporating the Patient’s Voice in Psycho-Oncology Research  Caribbean VII

P  18. Meeting the Psychosocial Needs of Adolescents and Young Adults on and off Treatment  Caribbean IV

G  19. The Emerging Clinical Conversation About Physician Assisted Death  Caribbean V

A G P  20. APOS Presidential Reflections: From Clinical Care to Policy  Caribbean VI

6:30 PM – 11:30 PM  Complimentary shuttles to Disney Springs  Convention Center Lobby

Saturday, February 18, 2017

7:00 AM – 12:00 PM  Registration  Caribbean Registration

7:30 AM – 8:30 AM  Integrative Medicine – Special Interest Group  Boca I

8:30 AM – 10:00 AM  Podium Sessions

G  21. Methodology and Measurement  Caribbean IV

P  22. Adjustment and Decision-Making  Caribbean VI

A  23. Age-Related Differences and Economic Effects of Cancer  Caribbean VII

A G  24. End of Life and Bereavement  Caribbean V

10:00 AM – 10:15 AM  Networking Break in Exhibits  Caribbean Foyer

10:15 AM – 11:15 AM  Closing Plenary Session  Caribbean IV-V

A G P  Trauma and Resilience: An Elementary Approach
Speaker: George Bonanno, PhD, Professor of Clinical Psychology, Columbia University

11:30 AM – 1:00 PM  Podium Session

G  25. Care Delivery  Caribbean IV

P  26. Caregivers and Community Roles  Caribbean VI

P  27. End of Life and Bereavement  Caribbean V

A  28. Collaborative Care  Caribbean VII

1:00 PM – 1:15 PM  Closing Remarks  Caribbean V

A = Adult Track · G = Geriatric Track · P = Pediatric/AYA Track
Learning Objectives

Psychosocial Cancer Care Across the Lifespan: Achieving Equity in Psychosocial Oncology from Pediatrics to Geriatrics

1. Identify at least one evidence-based strategy, which may include innovative uses of data and technologies, for improving access to quality psychosocial cancer care, particularly patient navigation, survivorship care, and distress management for underserved and medically vulnerable patients of all ages and their families.

2. Translate at least one scientific finding into quality whole-patient psychosocial cancer care via collaboration among researchers, practitioners and advocacy groups, with special attention to vulnerable populations across the lifespan and including ethnic, racial, and cultural minorities, aging and pediatric U.S. populations.

3. Identify at least one practice-based advocacy or policy initiative that promotes health equity across the lifespan in psychosocial oncology nationally through integrating findings from psychosocial oncology clinical, biological, or biobehavioral research.

4. Identify at least one strategy for strengthening ethnic, racial, and cultural diversity among psychosocial oncology professionals.
Meeting Evaluation: All meeting attendees are urged to complete an evaluation of the meeting. Attendees who are requesting CE or CME credit for the meeting are required to complete the evaluation. This form is available online only. You may complete the evaluation on-line at http://www.apos-society.org. All evaluations must be completed by March 17, 2017.

Continuing Education and Disclosures: Attendees will be eligible to receive the credit hours listed below for attending the 14th APOS Annual Conference, February 15-18, 2017. To obtain CE credits for the conference, you must complete the post-conference meeting evaluation. All disclosures are available at the APOS Registration Desk and online at www.apos-society.org. There will be a $50.00 charge for scientific registrants to obtain CME or CE credits. CME/CE instructions will be available at the meeting registration desk and on the APOS website (www.apos-society.org). Upon completion of the post-conference CE/CME evaluation and attestation, your CE/CME certificate will be emailed to your email on file with APOS.

Satisfactory Completion: Participants must complete an evaluation form in order to receive a certificate of completion. Your chosen sessions must be attended in their entirety. Partial credit of individual sessions is not available.

Physicians: Accreditation Statement - This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of Amedco and the American Psychosocial Oncology Society. Amedco is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation Statement - Amedco designates this live activity for a maximum of 23.0 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
Nurses: Amedco is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation. This course is co-provided by Amedco and the American Psychosocial Oncology Society. Maximum of 23.0 contact hours.

Psychologists: This course is co-sponsored by Amedco and the American Psychosocial Oncology Society. Amedco is approved by the American Psychological Association to sponsor continuing education for psychologists. Amedco maintains responsibility for this program and its content. Maximum of 23.0 hours.

Social Workers: Amedco, #1346, is approved as a provider for social work continuing education by the Association of Social Work Boards (ASWB) www.aswb.org, through the Approved Continuing Education (ACE) program. Amedco maintains responsibility for the program. ASWB Approval Period: 6/24/2016 to 6/24/2019. Social workers should contact their regulatory board to determine course approval for continuing education credits.

Social workers participating in this course may receive up to 23.0 clinical continuing education clock hours.

Professional Counselors in these 37 states can submit ASWB = AK, AL, AR, AZ, CA, CO, CT, DC, FL, GA, IA, ID, IL, IN, KS, ME, MO, ND, NE, NM, NH, NV, OK, PA, TN, TX, UT, VA, WI, WY

MFT’s in these 25 states can submit ASWB = AK, AR, AZ, CA, CO, FL, IA, ID, IN, KS, ME, MO, NC, NE, NH, NM, NV, OK, PA, TN, TX, UT, VA, WI, WY

ADA Statement: ADA accommodations will be made in accordance with the law. If you require ADA accommodations, please indicate what your needs are at the time of registration. We cannot ensure the availability of appropriate accommodations without prior notification.

University of Michigan Comprehensive Cancer Center
Dr. Deane Wolcott trained in Adult Psychiatry at UCLA where he subsequently served on the full time faculty for 12 years. At UCLA he worked closely with the BMT, HIV/AIDS, chronic dialysis, and solid organ transplant services. He then worked for almost 20 years for Salick Health Care/Aptium Oncology.

Dr. Wolcott led the Aptium Oncology corporate consulting group to the UK NHS and served as Director of Business Development for its UK subsidiary Aptium Cancer Care. He was the Founding Director of Oncology Supportive Care Services at the Samuel Oschin Cancer Center, Cedars-Sinai Medical Center in Los Angeles, where he returned as Director in 2010 prior to the recruitment of its current Director, Scott Irwin, MD, PhD, in 2015.

As Founding Director, Dr. Wolcott created the first fully integrated interdisciplinary supportive care program in the Country. In addition to this innovative outpatient model, he also created a new deeply respectful way for professionals to communicate and support each other. Dr. Wolcott had a robust impact on supportive care programs internationally.

Despite having major national and international responsibilities for Salick/Aptium Oncology, including leading the development of psychosocial oncology services, he was a board member and ultimately president of APOS at a critical time in its development. His leadership was pivotal for the health and growth of the organization. In addition to being a former APOS president and Chair of the Annual Meeting Program Committee, he is presently Chair of the E-Health SIG.

Dr. Wolcott is internationally recognized for expertise in models for the delivery of comprehensive, multidisciplinary, patient-centered, high value psychosocial oncology/oncology supportive care services, optimizing the coordination of supportive care services and symptom management/palliative care services across all disease stages and care environments, and optimizing the role of advanced health information technology in the delivery of comprehensive oncology supportive care services.
Kauser Ahmed, PhD, is a clinical psychologist and the Associate Director/Training Director at the Simms/Mann-UCLA Center for Integrative Oncology, where she is responsible for the oversight of clinical care of patients and families touched by cancer since 2002. In addition to her work as a gifted clinician, she has been a highly skilled supervisor/mentor and instrumental in the development and implementation of innovative psycho oncology clinical services for patients and families.

Dr. Ahmed has played a critical role in establishing the psycho social assessment and treatment protocols for many of the oncology clinics at UCLA, and has created award winning interdepartmental psychoeducational programs to meet the needs of pre-surgical patients, adult and AYA survivors and minor children of parents with cancer. At UC San Diego Moores Cancer Center, she proposed and received philanthropic funding for a navigation program to assist patients and families across the cancer continuum.

Lastly, as the Training Director at the Simms Mann Center at UCLA, she developed and implemented the core curricula of a nationally recognized multidisciplinary psycho oncology training program. Since 2004, she has supervised the teaching/training of over 70 pre and post-doctoral clinical psychology students, MSW oncology students and chaplaincy interns, many of whom have gone on to their own careers as clinicians and researchers in psychosocial oncology. Dr. Ahmed is deeply grateful to her students, mentors and especially the patients and families who have shared their lives with her, and from whom she has the great privilege to learn every day.

Dr. Ahmed received her BA in Comparative Literature from Brown University and her doctorate in Clinical Psychology from the University of Denver. She completed her predoctoral clinical internship at UCLA Neuropsychiatric Hospital.
Dr. William Pirl is the Associate Director of the Sylvester Comprehensive Cancer Center, where he leads Cancer Support Services, and an Associate Professor of Psychiatry at the University of Miami’s Miller School of Medicine. He received his MD at Harvard Medical School and MPH at the Harvard School of Public Health. He completed residency at Massachusetts General Hospital (MGH) and fellowship at Memorial Sloan Kettering Cancer Center. Prior to Sylvester, Dr. Pirl was Director of the Center for Psychiatric Oncology at the MGH Cancer Center. Dr. Pirl is PI of an NCI-funded R25, the MGH Workshop on Methods in Supportive Oncology Research. This intensive 6-day workshop trains junior investigators in essential methods in supportive oncology research and provides mentorship for writing an entire research protocol/proposal. In addition to outstanding evaluations, participants have been significantly more likely to secure research funding after the workshop. Dr. Pirl’s own research interests include the impact of depression on cancer outcomes and how the emotions of patients and their oncologists influence each other and predict future treatment. His research has been funded by the National Cancer Institute and the American Cancer Society. Dr. Pirl was President of APOS in 2013.

Dr. Jennifer Temel is an Associate Professor of medicine at Harvard Medical School and Director of the Cancer Outcomes Research Program at the Massachusetts General Hospital (MGH) Cancer Center. She is the Clinical Director of Thoracic Oncology at the MGH Cancer Center and provides oncology care for patients with lung and esophageal cancer.

Her research focuses on improving palliative, supportive and end of life care for patients with cancer and their families. She has received funding from the National Cancer Institute, the National Institute of Nursing Research, the American Society of Clinical Oncology and the American Cancer Society to study novel methods of improving the care of cancer patients. One of the main focuses of her research involves studying the integration of palliative and oncology care in patients with advanced cancers. Her work in this area has been published in the New England Journal of Medicine and the Journal of Clinical Oncology.

Dr. Temel was awarded a National Cancer Institute mid-career development award to mentor others in palliative and end of life care in oncology. She also serves as the co-Principal Investigator on a National Cancer Institute grant to conduct a workshop on methods in supportive oncology research for junior faculty.
Dr. Jada Hamilton is an Assistant Member at Memorial Sloan Kettering Cancer Center, and Assistant Attending Psychologist in the Behavioral Sciences Service, Department of Psychiatry and Behavioral Sciences at Memorial Hospital in New York, NY. Prior to joining the faculty of Memorial Sloan Kettering, Dr. Hamilton received a BA in Genetics and Psychology from Ohio Wesleyan University (2004), an MA and PhD in Social and Health Psychology from Stony Brook University (2006, 2009), and an MPH from the Mailman School of Public Health at Columbia University (2010). Dr. Hamilton also completed a postdoctoral fellowship as part of the National Cancer Institute’s Cancer Prevention Fellowship Program.

Dr. Hamilton’s research examines psychosocial aspects of cancer prevention and control, including how people perceive, respond to, and make decisions regarding health risk information revealed by emerging genetic and genomic testing technologies. The goal of her program of behavioral research is to translate advances in genetic and genomic medicine into improvements in patient care and public health. For example, with a current project funded by an American Cancer Society Mentored Research Scholar Grant (MRSG-16-020-01-CPPB), Dr. Hamilton is examining the process and outcomes of advanced cancer patients’ decisions to learn and communicate secondary germline findings arising from tumor genomic profiling to their families. Through this work, Dr. Hamilton aims to identify opportunities for improving communication and informed decision making between cancer patients, families, and clinicians regarding secondary germline findings that can arise from the use of precision medicine approaches such as tumor genomic profiling.
Francine Parnes, MA, JD, has been an award-winning journalist who has written extensively for leading news organizations including The New York Times and The Associated Press. She was also a reporter and editor for 10 years at The Denver Post, where she shared in a Pulitzer Prize as a member of the staff that covered the Columbine High School shootings.

More recently, Ms. Parnes has focused on serving the readership by addressing important issues in health and well-being. She co-edited a volume for clinicians, “Bereavement Care for Families,” published by Routledge in 2014, with a former chief of psychiatry at Memorial Sloan Kettering Cancer Center.

As a cancer survivor, Ms. Parnes serves on an advisory board for the Department of Psychiatry & Behavioral Sciences at Memorial Sloan Kettering Cancer Center. As a primary caregiver, she attends to her family’s ongoing medical challenges. Approximately eight years ago, she took on fulltime responsibilities as caregiver and medical advocate for her elderly parents in-home, overseeing their care and multiple serious diagnoses, including cancer. She has also assumed responsibility for the family business.

Among her community care commitments, Ms. Parnes has planned and hosted approximately 75 New York City harbor cruises for medical groups and centers. These charitable outings have served as a forum for education and liaison among physicians, mostly specializing in cancer. For her additional community service, Ms. Parnes received an award from the Elizabeth Birt Center for Autism Law and Advocacy in 2012.

Before starting her career in journalism, Ms. Parnes was an attorney in New York and Los Angeles. She graduated from Loyola Law School in Los Angeles, where she was Articles Editor of the Law Review. Earlier she received master’s degrees in languages and literature at the University of Michigan – Ann Arbor, where she was a teaching fellow.

Ms. Parnes came to appreciate the significance of the achievements of APOS primarily through her deep admiration of Dr. Jimmie Holland’s pioneering groundwork in psycho-oncology. As a caregiver, Ms. Parnes recognizes APOS’ important role in offering patients psycho-social support as they navigate the maze of cancer care.
Dr. Barry Bultz is Professor and Head of the Division of Psychosocial Oncology, and holds The Daniel Family Leadership Chair in Psychosocial Oncology at the Cumming School of Medicine, University of Calgary. He is also Professor of Psychiatry in the Cumming School of Medicine. He is also the Director of the multidisciplinary Department of Psychosocial Oncology at the Tom Baker Cancer Centre.

Dr. Bultz is an active member of many collaborative research initiatives, holds several grants and has published over 100 papers. He serves on a number of editorial boards for cancer-related journals. Dr. Bultz carries the message of the importance of attention to the emotional needs of the patient into many areas in the health care system. He advocates for the importance of recognizing the impact of cancer related distress on the patient’s experience. He has championed, advocated, published and presents frequently on the importance of Screening for Distress and has promoted “Distress” being branded the “6th Vital Sign.”

Dr. Bultz is a co-founder and Past President of the Canadian Association of Psychosocial Oncology (CAPO). From 2003 to 2006, Dr Bultz served as an Invited Director of the Board of the American Psychosocial Oncology Society. From 2012 to 2014, Dr. Bultz served as President of the International Psycho-Oncology Society. He is a Fellow of the Canadian Psychological Association. He received the Award of Excellence in Medicine and Health from the Canadian Cancer Society – Alberta Division, and the Award of Excellence from the Canadian Association of Psychosocial Oncology. In 2016 he was the recipient of the Arthur M. Sutherland Award from the International Psycho-Oncology Society. In 2016, he also was honoured with the Alberta Order of Excellence, the Province’s highest honour bestowed upon Albertans who have served with excellence and distinction and whose contributions have made a lasting impact.
Dr. Michelle Fingeret initiated her psychosocial oncology career following the acquisition of her PhD in Clinical Psychology from the University of Texas A&M in 2004. In 2007, she was appointed as Assistant Professor within the MD Anderson Cancer Center in the Department of Behavioral Science with in the Division of Cancer Population Sciences, and later promoted to Associate Professor in 2013. Also, Dr. Fingeret received additional appointments as an Assistant Professor in 2007 in the Departments of Head & Neck Surgery and Plastic Surgery, and as Associate Professor in 2013.

Dr. Fingeret’s research background and clinical expertise are in the areas of body image, psychosocial oncology, and quality of life for cancer survivors. The multidisciplinary research she has been conducted includes both small and large research studies, many of which have been funded through institutional grants, the National Institutes of Health, and the American Cancer Society. Much of her work involves collaborating with investigators across the United States in various fields such as surgical oncology, reconstructive surgery, and biomedical engineering. Her research is centered on identifying the nature and extent of body image concerns in different cancer populations, identifying risk factors associated with poor psychological adjustment to alterations in body image, and developing psychotherapeutic interventions to alleviate body image suffering in the oncology setting. In addition to her research activities, she is the founder and director of the Body Image Therapy Service. This unique program provides psychological counseling to patients experiencing distress related to body image changes resulting from cancer treatment at MD Anderson Cancer Center.

Dr. Fingeret has been a co-author on 42 peer-reviewed original research articles, 4 invited articles, 5 book chapters, and 10 published abstracts. In terms of conference presentations, she has presented at 4 symposia, 5 invited workshops, and more than 50 scientific exhibitions. Equally impressive, Dr. Fingeret has made a serious commitment to teaching courses within her institution, training programs, mentoring initiatives, and clinical and teaching supervision.

As for APOS, she has been a member of the Annual Scientific Program Committee since 2009, Marketing Chair from 2010-2011, Treasurer from 2011-2012, and President Elect/President/Past President from 2013-present. Dr. Fingeret helped to develop and launch the APOS Webinar Series as well as the APOS Future Fund. As President, she presided over the APOS/IPOS World Congress of Psycho-Oncology. During these past three years, she also carefully steered APOS through a difficult transition of identifying a new management firm without disruptions to APOS’ daily operations.
Barbara Given is one of the most consistently well-funded nursing researchers in oncology nursing. She has successfully obtained funding from the National Institutes for Health for more than 30 years. Her areas of investigation include long-term cancer home care, family caregivers, cancer nursing intervention, adherence with oral cancer medication and cancer symptom management. Her research has employed Interactive Voice Response systems to monitor symptoms of patients in their homes, and to provide them with evidence-based information to manage their symptoms using a Symptom Management Toolkit her team developed.

She is one of the charter members of the Midwest Nursing Research Society and the Oncology Nursing Society. She was honored at Michigan State University as a University Distinguished Professor (2001), was the Associate Dean for Research College of Nursing (2007-2012) and Director of the PhD program College of Nursing (2007-5/2015). She is currently the Interim Associate Dean for Research and the PhD Program. She serves on the Sparrow Health System Governing Board where she is the Chair. She is a Visiting Professor at Vanderbilt.

Honors include: the Council for the Advancement of Nursing Science (CANS) Outstanding Nurse Scientist Award (2016), Burdette Kunkel Behavioral Research Achievement Award, presented by the Behavioral Cooperative Oncology Group (2014), Distinguished Oncology Nursing Lectureship from the James Cancer Hospital at The Ohio State University Comprehensive Cancer Center (2013), Sparrow Nurses Lifetime Achievement Award (2013), ONS Distinguished Service Award (2006), Oncology Nursing Society (ONS)/Schering Excellence in Cancer Nursing Research Award (2002), Friends of the National Institute for Nursing Research Pathfinder Distinguished Researcher Award (2001), the Lifetime Achievement Award from the MSU College of Nursing Alumni Association (2000), The Cancer Nursing’s Research Article Award was named in her honor (2013). She began her work with Sparrow Hospital in January 1966.
Dr. Cecile Lengacher is an internationally recognized nurse scientist, with expertise in bio-behavioral clinical trial intervention research including psycho-oncology, psychoneuroimmunology, and complementary alternative medicine (CAM), emphasizing the link between physiological and behavioral outcomes for cancer survivors. She is a Professor and Director of the Pre-Doctoral Fellowship Program at the USF College of Nursing and for the past 19 years serves as a faculty member of the Moffitt Cancer Center Outcomes and Behavioral Program in the Population Sciences Division, and Integrative Medicine, and Breast Cancer Clinical Programs.

Nationally, she is honored as a Fellow of the American Academy of Nursing and has participated as a member of the NIH BMIO Scientific Review Study Section, along with being a reviewer for several journals including *Psycho-Oncology*. She has extensive experience in leading bio-behavioral multidisciplinary teams to test the efficacy of MBSR on psychological, physical, and biological outcomes among cancer survivors and caregivers for multiple NCI and other funded grants. She has published over 120 peer-reviewed papers published in peer-reviewed journals, including *Psycho-Oncology*, and numerous book chapters, monographs, and technical reports that include the effects of CAM therapy intervention research on symptoms and quality of life while examining the biological mechanisms of action, natural killer cells, stress hormones, cytokines, telomeres, and genes.

Her research has advanced the scientific evidence of behavioral intervention research and symptom science to improve the quality of life among cancer survivors and caregivers. She has clearly made significant contributions to the science of psychosocial oncology by presenting her research findings internationally at IPOS annual meetings and at every APOS scientific meeting since 2005. For a decade she has been a member of the APOS Scientific Review Committee; she has also served on the Program Committee and as Co-Chair of the IPOS/APOS 2015 Scientific Review Committee, along with serving on the Research committee and Secretary of the APOS Board since 2015.
Dr. Maryland Pao is the Clinical Director and Deputy Scientific Director of the National Institutes of Health Intramural Research Program at the National Institutes of Health. She serves as Chief of the Psychiatry Consultation Liaison Service in the Hatfield Clinical Research Center. A native of Bethesda, she attended Wellesley College before completing a BA/MD program at Johns Hopkins University School of Medicine. She completed Pediatric and Psychiatric Residency training as well as a Child and Adolescent Psychiatry Fellowship at Johns Hopkins Hospital. Boarded in Pediatrics (1994, 2001), she is currently certified in General Psychiatry, Child and Adolescent Psychiatry and Psychosomatic Medicine.

Her research interests are in the complex interactions between medical and psychiatric symptoms in pediatric oncology, pediatric HIV and other primary immunodeficiencies and in the impact of these diseases on a person’s development. She studies distress and its correlates in medically ill children including suicidal thoughts and behaviors. She has published more than 120 research articles and chapters, and co-edited the *Quick Reference for Pediatric Oncology Clinicians: The Psychiatric and Psychological Dimensions of Pediatric Cancer Symptom Management, 2nd edition*, Oxford University Press, Oxford, 2015. She helped develop the ASQ™ (Ask Suicide-Screening Questions), a suicide screening tool for pediatric emergency departments, and *Voicing My CHOICES™*, an advance care planning guide for adolescents and young adults.

Dr. Pao has been a member of APOS since 2008. A leader in promoting the field of pediatric psychosomatic medicine, she is a recipient of the 2012 AACAP Simon Wile Award for leadership in Consultation. She is on the Clinical Faculty at Georgetown University, George Washington University and at Johns Hopkins University Schools of Medicine.
“HEALTH EQUITY IN CANCER CARE IS A DEDICATED FOCUS OF APOS. AS A WOMAN OF COLOR AND A COMMUNITY-MINDED PSYCHO-ONCOLOGIST, I AM GRATEFUL TO JOIN WITH MY FELLOW APOS LEADERS AND MEMBERS IN INFUSING HEALTH EQUITY RESEARCH AND PRACTICE, AND NURTURING THE NEXT GENERATION OF DIVERSE PSYCHO-ONCOLOGISTS.”

Dr. Kimlin Ashing
APOS Board of Directors, Director of Mentoring

MEMBERSHIP HAS IT PERKS!

- Reduced rates for conferences and symposia sponsored by APOS.
- Free participation in the APOS Webinar Series and free access to past recorded webinars as well.
- Access to the members-only website, which includes an online searchable membership directory, professional fellowship and education opportunities, online continuing education materials and much more.
- Member Listservs for the entire APOS membership and for Special Interest Groups.
- Opportunity to serve on APOS committees (all members) and be elected to office (full members).
- Bi-monthly member newsletter.
- Amazing networking opportunities.
- Opportunity to be listed as a care provider in the online referral listing and through the APOS Toll-Free Helpline.
- AND THE LIST GOES ON!

WE'RE CHANGING THE GAME.

APOS is the ONLY multidisciplinary organization in the United States dedicated to researching and treating the psychosocial aspects of cancer.

- Providing a forum for professionals and individuals.
- Raising the level of awareness of health professionals and the public.
- Developing and implementing educational programs for health professionals, patients, and the public.
- Developing a research agenda to be used as a guide for scientific study in the field.
- Developing standards of care and exploring innovative methods.
- Promoting education and training of health.
- Addressing the special needs of children, the elderly, and the underserved.
- AND MUCH MORE!

• Full Member ($199) – Curriculum Vitae Required with Application. If your CV is not received, your application will be processed for Associate membership

• Associate Member ($199) – No Curriculum Vitae Required with Application

• Member-in-Training ($132) – Letter from Advisor/Department Chair Required with Application
STATES REPRESENTED WITH APOS MEMBERSHIP

- 39 states in 2011
- 43 states in 2012
- 43 states in 2013
- 46 states in 2014
- 47 states in 2015
- 50 states in 2016 + SIX COUNTRIES!

APOS is pleased to host the second annual interactive Psychosocial Oncology Institute taught by leaders in psychosocial oncology. The APOS Psychosocial Oncology Institute is designed for students, interns, fellows, early career professionals, (nurses, physicians, social workers, psychologists, chaplains) as well as healthcare professionals switching their focus to oncology. Participants earn CEU’s in a relevant and enlightening setting! This year’s featured clinical topics that will improve patient care, include:

**Cancer 101: Adults**  
Deane Wolcott, MD, FAPOS, Cedars-Sinai Samuel Oschin Comprehensive Cancer Institute

**Cancer 101: Pediatrics/Adolescents and Young Adults**  
Anthony Audino, MD, Nationwide Children’s Hospital

**Ethical Challenges in Psycho-Oncology**  
Teresa L. Deshields, PhD, ABPP, Sitema Cancer Center  
Fay Hlubocky, PhD, University of Chicago

**Psychosocial Oncology 101**  
Bill Pirl, MD, Sylvester Cancer Center

**Interventions for Psychological Problems: Adults**  
Joseph A. Greer, PhD, Massachusetts General Hospital/ Harvard Medical School

**Interventions for Psychological Problems: Pediatrics and Young Adults:**  
Lori Wiener, PhD, DCSW, FAPOS, National Cancer Institute  
Stacy Flowers, PsyD, Nationwide Children’s Hospital

**Interventions for Symptom Management**  
Sharla Wells-DiGregorio, PhD, The Ohio State University Wexner Medical Center  
Nicole Taylor, PhD, University of Denver

**Current Trends in Healthcare Impacting Psychosocial Oncology**  
Mary Helen Davis, MD, University of Louisville School of Medicine

**Psychosocial Screening and Assessment: Adult**  
Paul Jacobsen, PhD, National Cancer Institute

**Psychosocial Screening and Assessment: Pediatric/Adolescent and Young Adults**  
Anne Kazak, PhD, Nemours Children’s Health System

**Restoring Balance Self-Care Workshop**

Chair/Speaker: Paul Thielking, MD, Huntsman Cancer Hospital

This workshop is primarily intended for clinicians, but is relevant to all groups that experience work-related stress and are at risk of burnout or compassion fatigue. Physician and nursing burnout is a significant problem that can contribute to job and career turnover, reduced workplace productivity, and decreased quality of patient care (Wallace, 2009). Burnout rates in internal medicine and pediatric residents is estimated to be around 75% (Fahrenkopf 2008, Shanafelt 2002), and is around 50% with physicians in practice (Dyrbye 2014). In the palliative care setting, burnout rates seem to be even higher,

*A = Adult Track  •  G = Geriatric Track  •  P = Pediatric/AYA Track*
with one recent study showing rates of 60% among physicians and 66% among non-physician providers (Kamal 2015). There is strong evidence supporting the use of mindfulness based group interventions to decrease burnout, decrease stress, and enhance engagement and sense of meaning at work (Krasner, 2009, Fortney, 2013, West, 2014). Over the past year, Dr. Thielking has developed a one-day self-care retreat for health care professionals to reduce burnout and enhance wellness. This retreat has been offered at the University of Utah to groups of primary care physicians and to non-physician clinicians in an oncology setting. This “Restoring Balance” retreat involves a professional quality of life assessment, didactic teaching, guided mindfulness exercises, facilitated group discussion, and time for personal reflection and sharing. There is an emphasis on gaining insight into personal styles of coping with stress, developing new tools to increase resilience, and enhancing a sense of meaning and purpose in professional life. The retreat concludes with each participant developing a written self-care plan.

Workshop 2 8:00 AM – 5:00 PM
Boca V

**A Meaning Centered Psychotherapy in Cancer**

Chair/Speaker: William Breitbart, MD, Memorial Sloan Kettering Cancer Center

Speaker: Allison Applebaum, PhD, Memorial Sloan Kettering Cancer Center

This is an experiential workshop which provides an overview of a novel counseling intervention for patients with advanced cancer entitled, “Meaning Centered Psychotherapy for Cancer Patients.” Participants will be introduced to the topics of meaning and spirituality as they relate to cancer care and the experience of patients with cancer. The basic concepts of Meaning Centered Psychotherapy will then be described. Meaning Centered Psychotherapy is based on the concepts of meaning as derived from the work of Viktor Frankl, MD, and adapted for use in cancer populations by our team at Memorial Sloan Kettering Cancer Center. Two forms of Meaning Centered Psychotherapy have been developed: Meaning Centered Group Psychotherapy (8 weekly 1½ hour sessions; Individual Meaning Centered Psychotherapy (7 weekly 1 hour sessions). Both interventions are manualized and randomized controlled trials are currently being conducted. Data from these studies will be presented as well. During the workshop, participants will have the opportunity to participate in experiential exercises utilized in Meaning Centered Psychotherapy. In addition, a detailed description of the intervention and the content of each session will be provided.
Effectively Communicating With Older Adults With Cancer

Chair/Speaker: Christian Nelson, PhD, Memorial Sloan Kettering Cancer Center

Speakers: Andy Roth, MD, Memorial Sloan Kettering Cancer Center
          Jimmie Holland, MD, FAPOS, Memorial Sloan Kettering Cancer Center

The Institute of Medicine report states that by 2030, 20% of the population will be over 65. Currently, almost two-thirds of cancer survivors in this country are elderly. Despite these percentages, few training programs teach communication skills which focus on the unique needs of older cancer patients. Attendees of this workshop will participate in three communication skills modules:

1) Geriatric Communication 101. This module encompasses foundational geriatric communication skills which address issues such as: the impact of ageism, unique decision making issues, neurosensory deficits (auditory, visual), and physical problems.

2) Communicating with Older Cancer Patients with Mild Cognitive Deficits. This module speaks to the intersection of mild cognitive impairment and cancer with aging. Current cancer treatments such as radiation and chemotherapy may increase the risk of mild cognitive impairment in older cancer patients. This module focuses on identifying mild cognitive impairment and effectively communicate with those with mild cognitive deficits.

3) Collaborative Decision Making with Older Cancer Patients and their Families. Decision-making is key in geriatric oncology as the costs vs. benefits of cancer treatments must be carefully weighed against the patient’s values and tolerance of treatment morbidity. This module teaches collaborative decision-making skills to effectively discuss treatment options within a family context.

Each module starts with a didactic presentation which reviews the relevant literature, outlines applicable communication skills, and presents an exemplary video demonstrating the communication sequence. Attendees are then split into small groups where they discuss model specific patient cases and practice the communication skills demonstrated in the didactic presentation. These modules are designed for psycho-social care professionals, nurses, and oncologists.
Communicating with Adolescents at End of Life: Ethical Dilemmas and Practical Solutions

Chair: Lori Wiener, PhD, DCSW, FAPOS, National Cancer Institute

Speakers: Maryland Pao, MD, National Institutes of Health
Julia Kearney, Memorial Sloan Kettering Cancer Center

Discussing advanced illness and end-of-life with adolescents and young adults (AYAs) is difficult due to complexities of family and medical systems, developmental issues and the challenges of addressing grief of patients, families and staff. Ethical dilemmas often present as barriers to good palliative communication. We will examine ethical considerations in the care of AYAs at end of life through the lens of a well-established framework for disentanglement of ethical and psychological factors when conflicts arise between patients, families and/or clinicians. Developmentally appropriate, palliative-care focused communication skills will be reviewed. Interdisciplinary, collaborative models of palliative care will be considered for a range of healthcare settings. Participants will learn and practice skills for introduction of ACP and engagement of AYAs and their families through role play, using Voicing My CHOiCES. Several additional clinical tools will be shared. Cases, including those that have been presented to ethics committees, will be systematically explored within this framework. With knowledge of medical ethics and adolescent development, and by first making a “situational diagnosis” to disentangle ethical and psychological issues, participants can learn much needed skills for effective, compassionate, evidence-based palliative communication with AYAs at end of life.

Supervising Therapists of Critically Ill Patients: Creative and Therapeutic Expressions of Loss and Recovery

Chair/Speaker: Norman Fried, PhD, Winthrop University Hospital

The experience of psychological trauma for patients with life threatening illnesses (and their families) includes a sense of emotional disempowerment and a spiritual and physical disconnection from others. Dying patients, either in the hospital or in hospice care, rarely speak in direct language about their psychological needs for power and connection at the end of life. Rather, they speak in symbolism; through metaphor, storytelling, letter writing or poetry. Understanding the messages that dying patients are trying to convey will help all medical and mental health professionals treat the patient and his family with greater honesty, power and dignity. More importantly, understanding the lessons the patients are trying to teach to their families can help make the
survivor’s therapeutic journey more meaningful, tolerable and successful. Through in-depth case illustrations that combine “real world” experiences with the terminally ill patients with clinical research and theory, this workshop will examine ways that psychotherapists, counselors and family members can effectively work together with the dying child. Excerpts from the presenter’s book, *The Angel Letters, Lessons That Dying Can Teach Us About Living* (Ivan R. Dee Press, 2007) will be offered to more clearly elucidate ways that all professionals can therapeutically impart the love, power and dignity that patients require at the end of life.

**Lunch for Workshop, POI and Distress Screening**  
Participants  
Caribbean I  
12:00 PM – 1:00 PM

1:00 PM – 5:00 PM

**Enhancing Access to Help for Cancer-Related Sexual Problems**

Chair: Leslie Schover, PhD, Will 2 Love, LLC

Speaker: *Jennifer Reese, PhD, Fox Chase Cancer Center*

Although over 60% of cancer survivors end up with severe, long-term sexual dysfunction, only 20% get professional help. Barriers include busy clinics, lack of training for oncology professionals in managing sexual problems, a stigmatized topic, limited insurance coverage, superficial patient education materials, and lack of specialty care for sexual problems in most cancer treatment settings. Patients from underserved or rural communities, or from minority subcultures are even less likely to get adequate care. The workshop will focus on practical ways to increase access for men and women with cancer, and their intimate partners, to accurate information on sexual side effects, self-help strategies, and guidance on getting expert professional care. A stepped-care system will be outlined, including how to find or develop educational materials, resource links, and referral networks for triaging patients (handout); how to use online or in-person cognitive-behavioral sex therapy to prevent or overcome sexual dysfunction (handout, case presentations); and guiding patients in choosing among options for medical treatment (handout, case presentations). Skills training will include: How and when to bring up the topic of sex in oncology treatment settings (role-plays,

case examples); options for questionnaire assessment (handouts, discussion); multidisciplinary treatment algorithms for the most common sexual problems after cancer (handouts, case examples); ways to engage a partner in sexual rehabilitation (case examples, role-plays); cultural competence (case examples, role-plays) and the utility of peer counseling or support group modalities (data presentation). Participants will receive a therapist manual.

Workshop 7  1:00 PM – 5:00 PM  
Boca IV

Art Therapy as an Evaluation Tool for Children With Cancer

Chair/Speaker: Olimpia Petzold, University of Zulia -Venezuela, Université Libre de Bruxelles-Belgium

This workshop is a 4-hour interactive activity where a variety of learning modalities is used, such as team exercises, examples case, inter –intra personal activities and experimentation with some art mediums with the purpose of showing, how Art Therapy can be used as an evaluation tool. It is not often easy to identify the impact of the cancer in the personal lives of young patients, since they do not tend to express their emotions verbally. It is highly relevant to know how use strategies to meet the patient’s needs through a pleasant method, not aversive for children and teenagers living with this harsh reality. During the workshop, the participants will know the main objectives (cognitive, emotional and behavior) and the basic steps to follow in an Art Therapy session using as reference an Art Therapy Program developed at Pediatric Specialties Hospital in Venezuela.

At the same time, participants will have a close approach to the different arts technics such as: drawing, painting, modeling, masks, writing a story and collage used to evaluate the needs and the experience of disease in children and teenagers with cancer. Finally, participants will learn that Art Therapy may be an evaluation method that uses images to facilitate the communication in the therapeutic setting. It will facilitate a more effective intervention.
Effective Strategies for Helping Psychosocial Oncology Clinicians and Researchers Deal With Compassion Fatigue

Chair/Speaker: Norman Fried, PhD, Winthrop University Hospital

Psychosocial Oncology Researchers and Clinicians often encounter difficult patients with emotional and/or physical challenges, yet few training programs offer focused instruction on working with the effects these children and families have on the professional. This is particularly true for professionals whose patients suffer from complicated grief and trauma related issues, such as critical and chronic illness, end-of-life decisions, and changes in family structure. This results in situations where professionals may be exposed to patients’ pre-existing personal and psychological issues in the clinic, hospital or laboratory. Such exposure can lead to the development of “Compassion Fatigue” in the researcher or clinician. Compassion Fatigue is the convergence of Primary PTSD, Secondary PTSD, vicarious traumatization and cumulative stress (burn out) in the lives of helping professionals and other care providers. Simply put, when helping others precipitates a compromise in the well-being of the teacher, compassion fatigue ensues. This workshop will explore and identify the distinctions between every day burn out from compassion fatigue. Strategies for protecting ourselves from CF will be discussed, and techniques for regaining emotional and physical well-being will be offered. In addition, guided relaxation and supervision of difficult cases will be offered.

Opening Reception

The Opening Reception, complimentary to conference registrants, will feature live music, hors d’oeuvres and a cash bar. Guest tickets are $25, and can be purchased at the registration desk.
**Registation**
Caribbean Registration Desk

**Wellness Workshop – Gentle Yoga***  
**Hibiscus**  

7:00 AM – 7:30 AM

*Sponsored by the Integrative Medicine Department at the UF Health Cancer Center – Orlando Health*

Gentle Yoga: Wake up your body and mind! This gentle yoga class will include movements to warm up your joints, release tightness and tension in your muscles and alleviate other discomforts in your body. The deep breathing practice and progressive relaxation techniques are some of the safest and most effective ways to manage stress, relieve pain, regain and maintain health and attain peace of mind.

The instructor is Nancy Sinton, Yoga Therapist, Integrative Medicine Department at the UF Health Cancer Center – Orlando Health and Founder of Breathlink Yoga Therapy.

*Attendees are requested to bring a yoga mat. Towels will be provided by the hotel.*

<td><strong>Boca I</strong></td>
<td></td>
</tr>
</tbody>
</table>

This SIG focuses on issues relating to caregivers of patients with cancer. There is growing recognition that comprehensive care for patients with cancer involves attending to the psychosocial needs of their informal caregivers, and caregivers represent an underserved population directly affected by cancer. The mission of the Cancer Caregiver SIG is to help work toward assuring that nationally, no cancer caregiver experiencing significant burden as a result of this critical role goes unidentified and deprived of necessary psychosocial services.
THURSDAY, FEBRUARY 16, 2017

Opening Session
Caribbean IV-V

Welcome from 2017 APOS Scientific Conference Committee Chair
Kevin Stein, PhD, FAPOS
Emory University

Welcome from APOS President
Isabel Schuermeyer, MD, Cleveland Clinic Taussing Cancer Institute

Opening Plenary

AGP Neural Regulation of the Cancer Genome
Steve Cole, PhD, Professor of Medicine and Psychiatry and Biobehavioral Sciences, David Geffen School of Medicine at UCLA

Does stress affect cancer? And if so, what can we do about it? This talk provides an update on medical and laboratory research on how the nervous system influences cancer. A range of new strategies are being developed to protect the health and well-being of cancer patients from the adverse molecular impacts of stress.

The Opening Plenary is generously sponsored by: WILEY

Networking Break in Exhibits
Caribbean I-III

10:00 AM – 10:15 AM

Symposium 1
Caribbean V

A Communication Skills Training: Helping Clinicians Communicate With Patients Across the Lifespan

Chair: Patricia Parker, Memorial Sloan Kettering Cancer Center

1.1 Palliative Communication Skills Training for Pediatric Nurse Practitioners: A Novel Program With Booster Sessions
Julia Kearney, Memorial Sloan Kettering Cancer Center

1.2 Communication Skills Training for Oncology Nurses to Improve Adult Patient-Oncology Nurse Communication
Smita Banerjee, PhD, Memorial Sloan Kettering Cancer Center

1.3 Improving How We Communicate With Older Adults With Cancer: Communication Skills Training
Christian Nelson, PhD, Memorial Sloan Kettering Cancer Center

A = Adult Track • G = Geriatric Track • P = Pediatric/AYA Track
Symposium 2  
Caribbean IV  
10:15 AM – 11:45 AM

**G How to Improve the Diagnosis and Treatment of Anxiety and Depression in Older Patients With Cancer**

Chair: Christian Nelson, PhD, Memorial Sloan Kettering Cancer Center  
Discussant: Jimmie Holland, MD, FAPOS, Memorial Sloan Kettering Cancer Center

2.1 Exploring the Conceptualization of Depression in Older Adults With Cancer  
*Christian Nelson, PhD, Memorial Sloan Kettering Cancer Center*

2.2 Managing Anxiety From Cancer (MAC): Initial Development of a Psychological Intervention for Anxiety in Older Adults With Cancer and Their Caregivers  
*Kelly Trevino, Weill Cornell Medical College*

2.3 A Telephone Psychotherapy to Help Achieve Wisdom in Older Cancer Patients: The Care Project  
*Andy Roth, MD, Memorial Sloan Kettering Cancer Center*

Symposium 3  
Caribbean VII  
10:15 AM – 11:45 AM

**F Considerations for Training in Psycho-Oncology: Review of Core Aspects of Successful Programs**

Chair: Meagan Dwyer, PhD, University of Kansas Medical Center

3.1 Development of a Psycho-Oncology Core Curriculum for Multidisciplinary Training/Certification  
*Sharla Wells-Di Gregorio, PhD, The Ohio State University*

3.2 Recommendations for Best Ethics Practices in Psycho-Oncology Supervision and Training Programs  
*Amanda Kracen, PhD, Webster University*

3.3 A Combined Psychosocial Oncology & Palliative Medicine Fellowship at the Ohio State University (OSU) James Cancer Hospital: Content, Objectives, Teaching Methods, and Evaluation  
*Sharla Wells-Di Gregorio, PhD, The Ohio State University*

3.4 Development of an Advanced Graduate and Internship Psychology Training Program in Psychosocial Oncology at the University of California, San Diego Moores Cancer Center  
*Veronica Cardenas, PhD, University of California, San Diego Moores Cancer Center*

3.5 A Tiered Didactic & Group Supervision Model for Beginning a Psycho-Oncology Training Program  
*Meagan Dwyer, PhD, University of Kansas Medical Center*
### Symposium 4
**Caribbean VI**

10:15 AM – 11:45 AM

**Using a Heuristic Approach to Explore Symptoms and Symptom-Self-Management in Adolescents and Young Adults With Cancer**

Chair: Jeanne Erickson, PhD, RN, University of Wisconsin

1. **Development of a Heuristics-Based Ipad App, the Computerized Symptom Capture Tool (C-SCAT) to the Explore Symptom Experiences of Adolescents and Young Adults With Cancer**
   
   *Lauri Linder, PhD, RN, University of Utah*

2. **Symptoms and Symptom Clusters Identified by Adolescents and Young Adults (AYAs) Using C-SCAT**
   
   *Suzanne Ameringer, PhD, RN, Virginia Commonwealth University*

3. **Symptom Self-Management Strategies Used by Adolescents and Young Adults (AYAs) With Cancer**
   
   *Kristin Stegenga, PhD, RN, CPON, Children’s Mercy Hospital*

4. **Why Use a Heuristic Approach for Symptom Assessment and Management?**
   
   *Nancy Woods*

### APOS Professional Education Committee Meeting
**Boca VI**

12:00 PM – 1:15 PM

The Professional Education Committee, led by the Director of Professional Development/Education, develops and sponsors activities to further the professional development of APOS members. This includes educational activities outside the annual meeting such as the APOS webinar series, a core curriculum on psycho-oncology, and more. Interested in joining this dynamic group? Come to the meeting for more details!

### APOS Membership Committee Meeting
**Boca III**

12:00 PM – 1:15 PM

The Membership Committee, led by the Director of Membership, recruits and retains APOS members by consistently seeking new and relevant ways to make the member experience beneficial. This committee also reviews all new member applications and makes final recommendations to the APOS Board of Directors. This is a great group to join if you want to be involved in contributing to the APOS membership. Come to the meeting for more details!
**Pediatrics – Special Interest Group (SIG)**  
**Boca I**

Greetings to APOS Pediatric SIG members! We are a growing group of interdisciplinary professionals committed to advancing the practice and science of psychosocial care for children living with cancer and their family members. This SIG aims to promote:

- Awareness of pediatric oncology clinical and research resources
- Networking and collaboration
- Best practices for incorporating psychosocial care into practice in clinics, hospital based programs and private practice.

We are thrilled to have you be a part of our Special Interest Group! Please feel free to join us.

In the meantime, Did you know? There is a website for pediatric psychosocial oncology professionals that provides resources for patients and families, training opportunities and new research? Check it out and feel free to send your own profile in so you can be better connected to your colleagues.

http://pediatrics.cancer.gov/psycho-oncology

**Sexual and Reproductive Health – Special Interest Group (SIG)**  
**Boca II**

The Sexuality and Reproductive SIG is open to those interested in helping patients live with cancer and/or treatment side effects that affect sexuality and reproduction acutely or chronically.

**Bereavement – Special Interest Group (SIG)**  
**Boca V**

The APOS Bereavement SIG invites conference attendees interested in clinical practice, education, and research related to death, dying, grief and bereavement in adults and pediatrics to join us. New members welcome!
This session highlights the best of the best posters that exemplify the conference theme, “Across the Lifespan: Achieving Equity in Psychosocial Oncology From Pediatrics to Geriatrics.”

   *Rina Fox, PhD, Northwestern University*

8.4 Exploring Differences in Distress in Breast and Gynecologic Cancer Survivors
   *Marshalee George, PhD, Johns Hopkins University School of Medicine*

APOS Fellows Reception (By Invitation) 7:00 PM – 8:30 PM

APOS welcomes the Class of 2017 APOS Fellows! All APOS Fellows are encouraged to attend to celebrate with us.
FRIDAY, FEBRUARY 17, 2017

Registration 7:00 AM – 6:00 PM
Caribbean Registration Desk

Wellness Session – Mindfulness Meditation 7:00 AM – 7:30 AM
Hibiscus

Sponsored by the Integrative Medicine Department at the UF Health Cancer Center – Orlando Health

Mindful Meditation: Join us as we combine gentle movements and breathing techniques to prepare the mind for meditation as we work towards eliminating the clutter of the mind. A great way to start your day!

The instructor is Nancy Sinton, Yoga Therapist, Integrative Medicine Department at the UF Health Cancer Center – Orlando Health and Founder of Breathlink Yoga Therapy.

Helpful Tips for Successful Grant-Writing 7:00 AM – 8:30 AM
Boca VIII

The APOS Research Committee will be hosting a session for junior investigators to learn useful strategies for improving grant-writing skills. Leading researchers from nursing, psychology, and social work will share helpful tips for successfully obtaining federal pilot and career development awards.

The session is open to all APOS Conference participants, and we highly encourage early-career and aspiring investigators to attend.

E-Health – Special Interest Group (SIG) 7:00 AM – 8:30 AM
Boca I

E-Health and m-Health technologies are rapidly becoming an important resource in the delivery of oncology supportive care services. The literature is rapidly advancing that e-Health and m-Health based services can improve patient reported outcomes, health care services delivery, and health care utilization. Please join our SIG meeting to share your interests, report on current and planned use of e/m-Health in your organization, and to network with other leaders. For information or to schedule a brief presentation you are welcome to contact Deane Wolcott at deane.wolcott@cshs.org.

Also please plan to attend the APOS E-Health SIG Symposium on Friday, February 17th from 9:45 AM – 11:15 AM in the Caribbean IV.
Psychiatric Oncology – Special Interest Group (SIG) 7:00 AM – 8:30 AM
Boca III

The newly-created Psychiatric Oncology Special Interest Group (SIG) welcomes members from all disciplines who have an interest in diagnosis and treatment of psychiatric disorders and neuropsychiatric complications encountered in patients with cancer. The SIG is open to all APOS members who are interested in the intersection of oncology, psychiatry, neuropsychology, and psychopharmacology. Please join us for our first official meeting to share ideas for how to make the SIG most useful to you!

Plenary
Caribbean IV-V

8:30 AM – 9:30 AM

Challenges and Opportunities at the Cancer and Aging Interface

Harvey Cohen, MD, Walter Kempner Professor of Medicine, Duke University Medical Center

Cancer is largely a disease of aging. Incidence and mortality rise progressively with age with the result that over ½ of cancer diagnoses, 50% of cancer deaths, and 60% of cancer survivors are over the age of 65. With the increase in the aging of the population, these numbers will increase further in the coming years. As with pediatric patients, elderly cancer patients differ from younger adult patients in a number of ways important for clinical care. These include: physiologic changes, heterogeneity of health status and function, multimorbidity, geriatric syndromes, differing presentations of common diseases, higher rates of adverse drug events, and differing goals of care. Comprehensive Geriatric Assessment has been applied to geriatric oncology patients to provide a better understanding of the status of individual patients including physical and cognitive vulnerability, and to better plan care. The older cancer survivor similarly presents complex issues that require a multidisciplinary approach to optimize outcomes, since the late effects of cancer and its treatment are compounded by age related changes noted above.

The Meet the Experts Luncheon is a ticketed events available for pre-registration at the price of $25 per person. Please see Registration Desk for availability.

\[ A = \text{Adult Track} \cdot G = \text{Geriatric Track} \cdot P = \text{Pediatric/AYA Track} \]
The Mattie Miracle Cancer Foundation, working with pediatric oncology psychosocial experts collaborated to develop a comprehensive set of evidence-based standards for the psychosocial care of children, published in full in a special issue of Pediatric Blood and Cancer. These standards have been endorsed by many groups and are being implemented at pediatric cancer centers in this country and abroad. This Town Hall session will provide perspective on the role of standards to address unmet psychosocial needs by a childhood cancer survivor and parent advocates. Ongoing research on psychosocial services offered in U.S. institutions, reports of early implementation efforts and billing considerations will be shared. Discussion will engage the audience in thinking about how to proceed with implementation efforts in their communities and nationally.
FRIDAY, FEBRUARY 17, 2017

Symposium 14
Caribbean VI

G Population Based Patient-Reported Outcomes Among Older Adults With Cancer

Chair: Keith Bellizzi, PhD, MPH, University of Connecticut
Discussant: Julia Rowland, PhD, National Cancer Institute / NIH / DHHS

14.1 The SEER-MHOS Linked Data Resource: A Data Linkage for Assessing Physical and Psychosocial Health of Older Americans With and Without Cancer
Erin Kent, PhD, National Cancer Institute

14.2 A Prospective Study Examining the Impact of Cancer on Age-Related Health Conditions of Older Cancer Survivors
Keith Bellizzi, PhD, MPH, University of Connecticut

14.3 The Prognostic Value of Pre-Diagnosis Health-Related Quality of Life on Survival: A Prospective Cohort Study of Older Americans With Lung Cancer
Laura Pinheiro, MPH, University of North Carolina at Chapel Hill

Symposium 15
Caribbean V

A Inequities in Tobacco Treatment for Cancer Patients: Who is Not Getting Care and Why?

Chair: Elyse Park, PhD, Massachusetts General Hospital
Co-Chair: Donna Greenberg, MD, FAPOS, Massachusetts General Hospital
Discussant: Jamie Ostroff, PhD, Memorial Sloan Kettering Cancer Center

15.1 Tobacco Treatment for Patients With Severe Mental Illness and Cancer
Kelly Irwin, MD, Massachusetts General Hospital

15.2 Smoking Cessation Program Needs Among Black and Hispanic Cancer Patients
Giselle Perez, PhD, Massachusetts General Hospital

15.3 Tobacco Assistance for Recently Diagnosed Cancer Patients: Who Does Not Receive Assistance?
Elyse Park, PhD, Massachusetts General Hospital

A = Adult Track • G = Geriatric Track • P = Pediatric/AYA Track
FRIDAY, FEBRUARY 17, 2017

**Symposium 16**
**Caribbean IV**
3:30 PM – 5:00 PM

*A G* Planning Ahead: Decisional Capacity, Advance Directives, and the Development of Innovative Approaches to Advance Care Planning in Adults With Cancer

Chair: Eliza Park, MD, University of North Carolina
Discussant: Donald Rosenstein, MD, University of North Carolina

16.1 Identification and Assessment of Oncology Patients at Risk for Impaired Decision-Making
*Eliza Park, PhD, University of North Carolina*

16.2 Four Integrated Interventions to Engage Patients and Families in Goals of Care and End of Life Planning
*Natalie Schnaitmann, LCSW, City of Hope National Medical Center*

16.3 Building a Medical-Legal Partnership That Addresses the Advance Care Planning Needs of Cancer Patients
*Cindy Rogers, MA, University of North Carolina at Chapel Hill*

**Networking Break**
**Caribbean Foyer**
5:00 PM – 5:15 PM

**Symposium 17**
**Caribbean VII**
5:15 PM – 6:45 PM

*A* Incorporating the Patient’s Voice in Psycho-Oncology Research

Chair: Joseph Greer, PhD, Massachusetts General Hospital

17.1 Decision Support for Symptom Self-Management During Cancer Treatment
*Mary Cooley, PhD, Dana-Farber Cancer Institute*

17.2 Patient Centered Research may Require Patient Input
*Susan McMillan, PhD, University of South Florida*

17.3 Patient, Family, and Stakeholder Engagement in a PCORI-Funded Study
*Jamie Jacobs, Massachusetts General Hospital*

17.4 Proactive Psychiatry Consultation and Case Management for Patients With Cancer and Serious Mental Illness and Their Caregivers: A Pilot Study
*Amy Corveleyn, MSW, LICSW, Massachusetts General Hospital*
### Symposium 18
**Caribbean IV**

**Meeting the Psychosocial Needs of Adolescents and Young Adults On and Off Treatment**

Chair: Gwendolyn Quinn, PhD, H. Lee Moffitt Cancer Center and Research Institute  
Co-Chair: Kristine Donovan, PhD, H. Lee Moffitt Cancer Center and Research Institute  
Discussant: Janella Hudson, PhD, H. Lee Moffitt Cancer Center and Research Institute

1. Exploring the Impact of AYA Concerns About Genetic Risk on Family Building Decisions  
   **Susan Vadaparampil, PhD, H. Lee Moffitt Cancer Center and Research Institute**

2. Overview of Formative Research: Emergent Themes  
   **Gwendolyn Quinn, PhD, H. Lee Moffitt Cancer Center and Research Institute**

3. Building a Collaborative, Multidisciplinary AYA Program  
   **Damon Reed, MD, H. Lee Moffitt Cancer Center and Research Institute**

4. Correlates of Psychosocial Service Use in AYA Cancer Patients  
   **Kristine Donovan, PhD, H. Lee Moffitt Cancer Center and Research Institute**

### Symposium 19
**Caribbean V**

**The Emerging Clinical Conversation About Physician Assisted Death**

Chair: Richard Key, MD, University of Texas at Austin Dell Medical School

1. Assessment of Eligibility  
   **Elie Isenberg-Grzeda, University of Toronto**

2. Ethical, Legal & Policy Implications for Medical Assistance in Dying (MAID)  
   **Sally Bean, MA, Sunnybrook Health Sciences Centre**

---

*A* = Adult Track  
*G* = Geriatric Track  
*P* = Pediatric/AYA Track
Symposium 20
Caribbean VI

5:15 PM – 6:45 PM

APOS Presidential Reflections: From Clinical Care to Policy
Chair: Deane Wolcott, MD, SOCCI Cedars-Sinai Medical Center
Discussant: Jimmie Holland, MD, Memorial Sloan Kettering Cancer Center

20.1 The Promise of Interdisciplinary Professionalism
   Donald Rosenstein, MD, University of North Carolina

20.2 Effective Strategies for Promoting Psychosocial Care as Part of Routine Cancer Care: Lessons Learned From Healthcare Delivery Research
   Paul Jacobsen, PhD, Division of Cancer Control and Population Sciences, National Cancer Institute

20.3 Alchemizing Clinical, Research and Educational Skills for Leadership in Biopsychosocial Oncology
   Matthew Loscalzo, LCSW, City of Hope National Medical Center

20.4 Challenges for Psychiatrists in Psychosocial Oncology
   William Pirl, MD, Sylvester Cancer Center

Complimentary shuttles to Disney Springs
Convention Center Lobby
6:30 PM – 11:30 PM

APOS Attendees can enjoy complimentary transportation to Disney Springs! Disney Springs is an outdoor shopping, dining, and entertainment complex at the Walt Disney World Resort. The shuttles will depart each hour from the Convention Center Lobby at the Caribe Royal.
SATURDAY, FEBRUARY 18, 2017

Registration 7:00 AM – 12:00 PM
Caribbean Registration

Integrative Medicine – Special Interest Group (SIG) 7:00 AM – 8:30 AM
Boca I

The APOS Integrative Medicine SIG will be hosting an on-site meeting and invite all interested attendees to participate. Planned discussion will include goal setting and activity planning for our next calendar year.

Podium Session 21 8:30 AM – 10:00 AM
Caribbean IV

**Geriatric/Aging Adults: Methodology and Measurement**

Chair: Alla Sikorskii, PhD, University of Arizona

21.1 Rehabilitation Research Priorities for Older Adults With Cancer: A Delphi Study With Implications for Psychosocial Oncology
  
  *Lynne Padgett, PhD, American Cancer Society*

21.2 Meta-Ethnography on Loneliness in Older Cancer Survivors: Layers of Silencing
  
  *Trisha Raque-Bogdan, PhD, University of Denver*

21.3 Depressive Symptom Profiles of Younger and Older Adult Patients in Oncology: A Confirmatory Latent Profile Analysis
  
  *Rebecca Saracino, MA, Yale University School of Medicine*

21.4 Psychometric Properties of a 47-Item Distress Screening Tool for Older Caregivers of Cancer Patients
  
  *Alexandra Zaleta, PhD, Cancer Support Community*

*A* = Adult Track • *G* = Geriatric Track • *P* = Pediatric/AYA Track
Podium Session 22  8:30 AM – 10:00 AM  Caribbean VI

**Pediatrics/AYA: Adjustment and Decision-Making**

Chair: Lori Wiener, PhD, DCSW, FAPOS, Behavioral Health Core, National Cancer Institute

22.1 Hope as a Predictor of Adjustment Following Pediatric Cancer Diagnosis: Implications for Intervention  
*Julie Germann, PhD, Children’s Medical Center Dallas/UTSW*

22.2 Exploring Health-Related Empowerment in Young Adults Living With Advanced Cancer  
*Rosalind Garland, RN, McGill University*

22.3 A Web-Based Positive Emotions Intervention for Young Adult Cancer Survivors: Preliminary Results From the EMPOWER Study  
*John Salsman, PhD, Wake Forest School of Medicine*

22.4 A Longitudinal Study of Cancer Risk Management for Reproductive Age BRCA Mutation Carriers: Family Formation as “Another Platter on the Smorgasbord of BRCA Crap”  
*Allison Werner-Lin, PhD, University of Pennsylvania*

Podium Session 23  8:30 AM – 10:00 AM  Caribbean VII

**Adults: Age-Related Differences and Economic Effects of Cancer**

Chair: Michelle Fingeret, PhD, University of Texas MD Anderson Cancer Center

23.1 Mental Health Comorbidity Costs and Healthcare Utilization in a Non-Elderly Population With Breast Cancer  
*Diana Jeffery, Department of Defense, Defense Health Agency*

23.2 Financial Stress and Cancer Among Older and Younger Working-Aged Adults  
*Kathleen Murphy, American Institutes for Research*

23.3 The Protective Role of Perceived Social Support Against Cancer Caregiver Distress: Moderating Effects of Age  
*Hannah-Rose Mitchell, MPH, University of Miami*

23.4 Adult Attachment Matters in Our Quality of Life and Neuroendocrine Health: Dyadic Investigation of Cancer Patients and Caregivers  
*Amanda Ting, MA, University of Miami*
**SATURDAY, FEBRUARY 18, 2017**

**Trauma and Resilience: An Elementary Approach**

*George Bonanno, PhD, Professor of Clinical Psychology, Columbia University*

Psychological resilience has become a popular concept, and as a result has taken on myriad and often overlapping meanings. To be a useful framework for psychological research and theory, Bonanno et al. (2015) argued that the study of resilience must explicitly reference each of four constituent temporal elements: (a) baseline or pre-adversity functioning, (b) the type of aversive circumstances, (c) post-adversity resilient outcomes, and (d) predictors of resilient outcomes. To illustrate these elements, I described research from my lab using latent trajectory modeling to identify prototypical trajectories of outcome, including the most common trajectory, the resilience. We observed these trajectories in response to a range of PTEs, including bereavement, terrorist disaster, military combat, spinal cord injury, bio-epidemic, and cancer surgery. I will also describe our research on predictors of the resilience trajectory and devote particular attention to our research on various components of flexibility in coping and emotion regulation, as well as other resilience-promoting factors.

*A* = Adult Track  ·  *G* = Geriatric Track  ·  *P* = Pediatric/AYA Track
Podium Session 25  
Caribbean IV  
11:30 AM – 1:00 PM

**Geriatric/Aging Adults: Care Delivery**

Chair: Charles Given, PhD, Michigan State University

25.1 Age Moderates Neurocognitive Deficits Among Allogeneic Hematopoietic Cell Transplant Recipients  
*Aasha Hoogland, PhD, H. Lee Moffitt Cancer Center and Research Institute*

25.2 Age Influences Oral Oncolytic Dosing, Retention, and Symptom Management Intervention Outcomes  
*Alla Sikorskii, PhD, University of Arizona*

25.3 Trends in Inpatient Palliative Care Consultation Services for Older Adults  
*Rebecca Saracino, MA, Yale University School of Medicine*

25.4 Impact of Psychiatric Comorbidities on Cost of Care and Healthcare Utilization in Multiple Myeloma (MM) Patients  
*Shehzad Niazi, MD, Mayo Clinic*

Podium Session 26  
Caribbean VI  
11:30 AM – 1:00 PM

**Pediatrics/AYA: Caregivers and Community Roles**

Chair: Erin Kent, PhD, National Cancer Institute

26.1 Psychosocial Risk and Predictors of Mood in Parents of Children With Cancer  
*Anna Muriel, MD, MPH, Dana-Farber Cancer Institute*

26.2 Creation of a Community-Supported AYA Cancer Coalition: The Fort Worth Adolescent Young Adult Oncology Coalition  
*Laura Howe-Martin, PhD, UT Southwestern Medical Center*

26.3 Caregivers of Preadolescent Childhood Cancer Survivors: Psychological Correlates of Intention Not to Vaccinate Against Human Papillomavirus (HPV)  
*Jessica Simmons, St. Jude Children’s Research Hospital*

26.4 The Essential Role of Community-Based Support in Benefiting Young People Who Have a Family Member With Cancer  
*Pandora Patterson, PhD, Canteen Australia*
Podium Session 27  
Caribbean V  
11:30 AM – 1:00 PM

**P** Pediatrics/AYA: End of Life and Bereavement

Chair: Maryland Pao, MD, National Institutes of Health

27.1 The Impact of a Family Bereavement Camp: Use of Qualitative Data Analysis to Determine Need and Develop Quantitative Program Evaluation  
*Julie Germann, PhD, Children’s Medical Center Dallas/UTSW*

27.2 Meaning-Centered Grief Therapy for Parents Bereaved by Cancer: Open Trial Findings  
*Wendy Lichtenthal, PhD, Memorial Sloan Kettering Cancer Center*

27.3 An Online Gratitude Intervention to Promote Well-Being in Young Adults With Advanced Cancer  
*Katharine Adelstein, PhD, RN, Vanderbilt University School of Nursing*

27.4 Bereavement Debriefings: Enhancing Grief Management Strategies and Staff Wellness  
*Patty Prince, LCSW, National Institutes of Mental Health*

Podium Session 28  
Caribbean VII  
11:30 AM – 1:00 PM

**A** Adults: Collaborative Care

Chair: Carolyn Messner, PhD, LCSW, MSW, Cancer Care, Inc.

28.1 The American Cancer Society Survivorship Guidelines: From Systematic Review to Dissemination Tools  
*Lynne Padgett, PhD, American Cancer Society*

28.2 Proactive Psychiatry Consultation for Patients With Severe Mental Illness and Cancer: A Pilot Study  
*Kelly Irwin, MD, Massachusetts General Hospital*

28.3 Better Outcomes for Thyroid Cancer Patients Receiving an Interdisciplinary Team-Based Care Approach (ITCA-ThyCa) Compared to Controls: Program Evaluation Results Indicating a Need for Further Integrated Care and Support  
*Melissa Henry, PhD, McGill University*

28.4 Suicidal Ideations are Prevalent in Head and Neck Cancer Patients and Predate Diagnosis: Longitudinal Study Indicating the Need for Suicide Prevention and Collaborative Care in ENT Clinics  
*Melissa Henry, PhD, McGill University*

Closing Remarks  
Caribbean V  
1:00 PM – 1:15 PM

*A* = Adult Track  ·  *G* = Geriatric Track  ·  *P* = Pediatric/AYA Track

G F77. Self-Efficacy and Negative Mood as Predictors of Symptom Distress Among African American Prostate Cancer Survivors

A F78. Anxiety and Intensity of Cancer-Related Physical Symptoms in Hispanic Cancer Patients From Puerto Rico

A F79. Understanding Sleep Disturbance in Patients Utilizing Psycho-Oncology Services

A F80. An Exploration of Physical versus Emotional Distress Symptoms in Patients Referred for Psycho-Oncology Services

A F81. Comparison of Sexual Life Between People With Stable Chronic Diseases and Cancer Survivors

A F82. The Role of Stressful Life Events on the Cortisol Secretion Patterns of Breast Cancer Survivors

A F83. Process for Identification and Care Planning of High Risk Psychosocial Candidates for Blood and Marrow Transplant
Antoni, Michael:

Clark, Karen:
   SupportScreen, Royalties for touch screen (Self). NCI, Salary support (Self).
   Novartis, Speaker (Self).

Clayman, Marla:
   Lilly, Consultant (Self).

Deshields, Teresa:
   Eli Lilly, Speakers Bureau (Self). Genentech, Speakers Bureau (Self). Bristol Meyers Squibb, Consultant (Self).

Loscalzo, Matthew:
   Novartis, Speaker (Self). City of Hope, Royalties SupportScreen (Self). NIH, PI (Self).

McQuellon, Richard:
   Lilly, Speaker, Advisory board (Self). Genentech, Speaker (Self).

Mohamed, Ashraf:
   Novartis, Speaker (Self).

Patterson, Pandora:
   CanTeen Australia, Employment (Self).

Pinheiro, Laura:
   Johnson & Johnson (Ethicon), Financial relationship (Spouse).

Rodriguez, Carmen:
   Chameleon Adaptiveware, intellectual property rights and potential royalty arrangements if product is commercialized in the future (Self).

Rosenstein, Donald:
   Up To Date, Honorarium (Self). Oxford University Press, Royalties for book (Self).

Schover, Leslie:
   Will2Love, LLC, Founder of for-profit startup (Self).

Sikorskii, Alla:
   NIH, Grant to Michigan State University (Self).

Vadaparampil, Susan:
   Myriad Genetics Laboratories, Research funding (Self).

Wolcott, Deane:
   3D Live|AXO, Vice President (Self). Clear Voice Health, Clinical Advisor (Self).

Yopp, Justin:
   Oxford University Press, Contract in place to write book about the experiences of widowed fathers in our first support group. Some of the data presented in this study may also be included in the book; however, that is a very small component and not otherwise financially-driven (Self).

Notes:

Stay Connected.
Did you know that APOS is more than an annual conference? Although our conference is the most prominent extension of us, the society offers wonderful things all year long! From webinars to relevant articles, we're your go to place for all things psychosocial oncology. APOS is not just a membership based society, it's a community and one that you're a valuable part of. Stay in the know, be part of the conversation and let's stay connected!

We're on Facebook. Let's be friends! You tweet. We tweet. Follow along!

Want to REALLY be connected? Link in! Visit our website often for recent news!

APOS SOCIAL MEDIA ADDRESSES:

- FACEBOOK: facebook.com/APOS-American-Psychosocial-Oncology-Society-322633349575
- TWITTER: twitter.com/APOSHQ
- LINKED IN: linkedin.com/company/american-psychosocial-oncology-society
- WEBSITE: APOS.SOCIETY.ORG
APOS is the only multidisciplinary organization in the United States dedicated to the psychological, behavioral, and social aspects of cancer.

APOS membership brings together 500+ multidisciplinary practitioners and scientists from psychiatry, psychology, social work, nursing, oncology, clergy, patient advocacy, and social and behavioral health fields.

**READ & RESEARCH**

Psycho-Oncology: Journal of the Psychological, Social and Behavioral Dimensions of Cancer

Quick reference handbooks for professionals working with adult, pediatric and geriatric cancer patients.

Psycho-Oncology textbook, published in collaboration with IPOS.

**FIND YOUR FIT**

Special Interest Groups (SIGs) allow cross-disciplinary professionals to collaborate and network.

- Bereavement
- Cancer Caregivers
- E-Health
- Health Equity and Cultural Diversity
- Integrative Medicine
- Pediatrics
- Psychiatric Oncology
- Sexual & Reproductive Health
- Spirituality

Mentoring opportunities build connections for APOS members to learn from each other and further develop their careers.

**CANCER SUPPORT HELPLINE**

Part of the Cancer Support Helpline® (affiliated with the Cancer Support Community), APOS’s Helpline (1-866-APOS-4-HELP) is a national resource to help people with cancer and their caregivers find emotional support in their own communities.
