

The Oncology Care Model

Lessons from the Past

Lessons for the Future

February 28, 2020 | 12:00 PM – 1:00 PM CDT | 1:00 PM – 2:00 PM EDT

Presented By:

Blase N. Polite, MD

Value Based Payment for cancer care is a rapidly evolving model with the implementation of the Medicare Oncology Care Model and the proposed Oncology Care First Model. Understanding the specification of these models will be critical for all cancer care leadership to understand both how to succeed in these models as well as to understand the pitfalls in them. This webinar will provide data experience from a physician leader in the field to understand where the opportunities are and where the model clearly needs improvement going forward. The webinar will take a deeper dive in the area of how drugs and quality metrics play into model success.

Learning Objectives:

- Describe the positive changes from the Oncology Care Model in terms of Value Based Care Delivery
- Review the major limitations of the model as they pertain to the inclusion of oncology care drugs in the total cost of care model
- Discuss the proposed design of the Oncology Care First Model
- Explore alternative value-based payment designs for oncology
