

Perri Tutelman is a senior PhD student in Clinical Psychology at Dalhousie University and the IWK Health Centre in Halifax, Canada. Her research is based at the Centre for Pediatric Pain Research under the supervision of Dr. Christine Chambers. Perri's clinical and research interests include pain in pediatric oncology, the role of families in pain, and implementing pain evidence into practice. She has published numerous studies examining the experience and management of pain in children with cancer across the disease

trajectory and has expertise in various research methods including experimental pain and qualitative research. Perri is a co-investigator on an international panel developing clinical practice guidelines for the management of pain in children with cancer and has extensive clinical experience with cognitive-behavioral techniques for pediatric pain management. Perri's work has been supported by several provincial and national organizations including the CIHR Vanier Canada Graduate Scholarship program, Research Nova Scotia, the Beatrice Hunter Cancer Research Institute, and she was the 2016 recipient of the Nova Scotia Health Research Foundation's Colleen Elliott award for Excellence in Cancer Research.
