

Psychologist in Hematology/Oncology/Stem Cell Transplantation

New York Medical College
Maria Fareri Children's Hospital
Boston Children Health Physicians

Boston Children's Health Physicians and New York Medical College is looking to fill a Psychology position within the division of Pediatric Hematology/Oncology/Stem Cell Transplant. This psychologist will have a focus in Oncology and bone marrow transplant in children, adolescents, and adults. Typical clinical activities include psychosocial and psychodiagnostic assessment and individual, group, or family psychotherapy. Psychologists are expected to round during team meetings and the inpatient unit when able to do so. Teaching is an integral part of the position, with expectations to supervise trainees in psychotherapy as well as participate in interdisciplinary teaching with medical students, residents, and fellows. A faculty appointment and participation in academic pursuits at New York Medical College is expected. Support is provided to develop one's research program. The opportunity to teach courses as part of Touro University's PsyD program with a health emphasis is also available for additional pay.

Qualifications:

- Applicant is required to have a PhD or PsyD in Clinical Psychology from an APA accredited institution and have completed an APA accredited internship with extensive experience in health populations and behavioral medicine. Applicants must also have completed their postdoctoral training hours.
- Prior experience with hematology/oncology and/or transplant populations is preferred. Knowledge of neuropsychological assessment.
- Interest in clinical research is highly recommended.
- Licensed or License eligible in NYS.
- Spanish speaking providers encouraged to apply.
